**Boråstapeter's Beautiful Traditions**, available from Furnishing Distributors, [Furnishing.ie](http://Furnishing.ie)

### HOW MANY ROLLS WILL I NEED?

- ▶ Most wallcoverings are available in standard rolls; 10.05m (33") long and 52cm (21") wide
- ▶ Work out the required overall length of each drop. This is the height of the wall plus 50mm (2") at the top and bottom and any allowance for pattern repeat.
- ▶ Divide this figure into 10.05metres (33ft). The result of this division equals the number of drops that you will need
- ▶ Measure around the room, ignoring doors and windows, and allow two drops per metre to give you the total number of drops you need.
- ▶ Divide this by the drops per roll to give the number of rolls required to paper the "full length" areas. If the offcuts are insufficient for the spaces over the doors and windows, add an extra roll.
